Empowering Education through Data Literacy Integration in Compulsory Education

Project Number: 101195801 – ERASMUS-EDU-2024-POL-EXP-DIGITAL
Implementation Period: March 1, 2025 – February 29, 2028

Empowering teachers, shaping data-aware citizens, and
transforming education through data literacy.

Project Objectives

01 Strengthen Data Literacy in Schools

Map current practices in data education across Europe.

02 Build a Common Framework

Define core data skills and learning goals for schools.

03 Empower Educators

Train teachers with practical tools and resources.

About the Project!

DATA-READY tackles the growing need for data literacy in schools across Europe. It develops a clear educational framework and equips teachers with training and tools to teach data skills effectively. Through research and pilot programs, the project aims to make data literacy a key part of everyday teaching and future education policies.

Project Results

Data Literacy Framework 01

A structured guide on key skills, goals, and how students progress.

Teacher Training 02

Practical courses for future and current teachers to teach data literacy.

Classroom Toolkit 03

Lesson plans, activities, and tools ready to use in schools.

Policy Guidance 04

Evidence-based advice for integrating data literacy into national systems.
