

DATA - READY Newsletter Issue 3

AUGUST 2026

Welcome to the third issue of the DATA-READY newsletter!

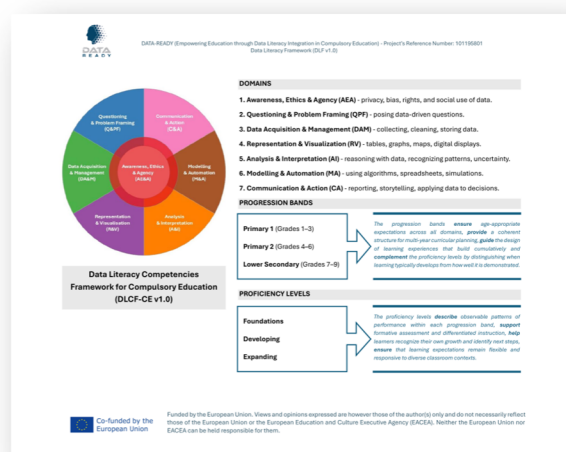

Since our February 2026 newsletter, DATA-READY has moved from stakeholder consultation into a decisive phase of validation, framework publication and training design.

Between March and August, partners completed the validation workshops, released the first working draft of the European Data Literacy Framework and its Quick Reference Guide, and began translating the framework into practical learning modules for future and practising teachers. This issue gathers the main milestones and looks ahead to piloting.

Highlights from March to August 2026

From March to August 2026, the consortium reached four major milestones:

- Framework validation completed across the partner countries
- First working draft and Quick Reference Guide published
- Training-course prototypes developed for pre-service and in-service teachers
- Project insights shared through European conferences and networks

These achievements provide a shared foundation for the next phase: developing and piloting teacher-training modules. Explore the full stories and project resources at www.data-ready.eu.

AUGUST 2026

From Framework to Teacher Training

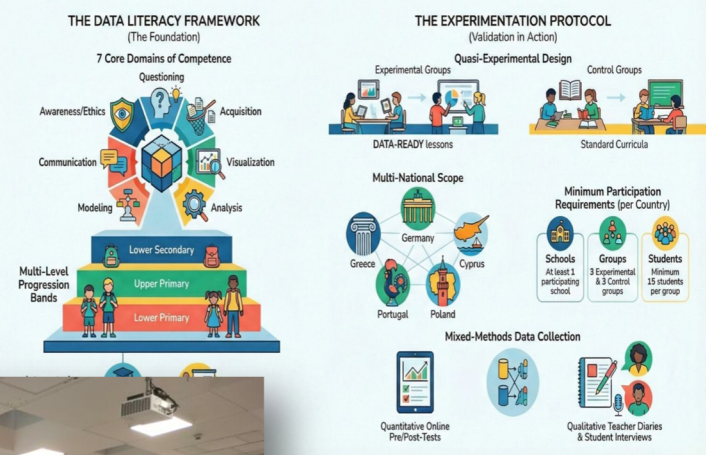

Validation workshops with educators, researchers and field experts were completed in all partner countries. Feedback sharpened the Framework's seven competence domains, three progression bands and links to classroom practice, curricula and policy.

On 24 May, DATA-READY published the first working draft of the European Data Literacy Framework together with a concise Quick Reference Guide. The resources now provide a common basis for piloting, training design and continued stakeholder dialogue.

At the Mainz transnational meeting on 7–8 May, partners developed first prototypes for two complementary learning offers: a course for higher-education students in pedagogical departments and continuing professional development for in-service teachers. During the summer, these prototypes were shaped into practical, adaptable modules ready for testing and refinement.

DATA-READY: Validating a European Framework for Data Literacy

AUGUST 2026

DATA-READY Across Europe

DATA-READY continued to share evidence across Europe. The project featured at events in Rhodes, Paphos, Nicosia and Thessaloniki and at TECH-EDU 2026 in Alexandroupolis. At ECER 2026 in Tampere (18–21 August), partners presented two posters: one on developing and piloting a higher-education teacher course, and one on Portuguese curriculum mapping and stakeholder perspectives. On 1 July, the project also joined a European data-literacy resource and interactive mapping initiative led by France Éducation internationale and IIEP-UNESCO.

What's Next

The coming months will focus on turning the validated Framework into practical professional learning. Partners will finalise adaptable modules for pre-service and in-service teacher education, then pilot and refine them in the partner countries.

On 25–26 September, DATA-READY will present framework-validation work at the 'Greece 2040' conference in Athens. The consortium is also advancing two book chapters and a cross-national journal article, all currently under review, while continuing policy dialogue and sharing emerging resources through the project website and European networks.
